Software Engineering Undergraduate

Profile

Undergraduate

I am a dedicated first-year undergraduate student pursuing a BSc(Hons) in Software Engineering from Birmingham City University, UK, currently studying at the Java Institute for Advanced Technologies, Sri Lanka. I have a strong foundation in Java and JavaScript, with additional experience in web development and database management. My passion for problem-solving and software development drives me to deliver high-quality solutions. I excel in analytical thinking, teamwork, and adaptability, aiming to grow alongside a talented engineering team to develop world-class software products.
